

We open dreams...

With your needs in mind.

Nowadays we live in a constant rush, trying to find peace, beauty and a safe refuge at home and in the places where we live. A sense of security and harmony definitely improve everyday quality of life. INVADO understands and respects these needs. Being one of the most rapidly. As one of the most rapidly developing manufacturers of door joinery and skirting boards in Poland, we do our best to give you the best products to meet your needs, to give you products with high, individual aesthetics and the best possible usability features. functional features. INVADO is also a leading supplier of components for the furniture industry. Its market position is being built on the basis of over twenty-five years of experience and continuous investment in technology, people and quality improvement.

 **INVADO**[®]
doors

Quality above all

INVADO continually strives to ensure optimal quality of its products, taking into account the individual needs of users. Quality is paramount - this is the basic issue in the design phase and remains the common denominator for all production processes. ISO 9001:2015 certificate provides such an approach to the issue of quality. All INVADO products meet European standards. The high level of products and services next to the price and delivery time is the primary objective of the Company, ensuring its perception as a trusted partner.

INVADO Technology

Production of door leaves and door frames is the strongest point of INVADO offer, therefore a major breakthrough in the Company's activity was the implementation of innovative production technology of foiled doors (INVADO Technology). A characteristic feature of this technology is foiling of surfaces without connecting of foil on rebate edges. Due to this method the edge looks aesthetically and is also more resistant to damage. In principle there is no possibility of breaking off the foil, because the connection of foil is placed in the inner edge of the rebate - invisible to the eye. „Technology of foiling flat doors in the mass production system” is used since 2007 in case of all foiled doors. In addition – off-rebate foiling makes the INVADO doors as the only ones on the market have rounded edges, safe for adults and children hands. Now thanks to the innovative method of doors' production, INVADO is among the most technologically advanced companies in Europe.

Hygienic certificates

Certification aims to prevent the introduction into general use of materials and products hazardous to health and life of users or limit the allowable scope and method of their application for the elimination of health risks. All INVADO products have hygienic certificates:

- Foiled interior door leaves hygienic – certificate No. 348/322/353/2020;
- Foiled interior door frames hygienic – certificate No. 170/322/193/2012;

Technical Approvals and National Technical Assessments:

Technical Approvals (until the end of their term) and National Technical Assessments, issued by Building Research Institute, are the decisions to admit the use of building materials and products. In accordance with the Construction Products Act of 16 April 2004, as amended (unified text: Journal of Laws of 2016, item 1570), the products to which the Technical Approvals and National Technical Assessments relate, may be placed on the market and can be used in construction. INVADO Company assessed and verified the constancy of performance, made a national declaration of performance and labeled the products with a construction mark in accordance with the applicable regulations. INVADO's Technical Approvals and National Technical Assessments:

- Interior flat and glass doors - ITB-KOT-2017/0313 edition 1;
- Modular interior doors - ITB-KOT-2017/0003 edition 1;
- Folding, swinging and sliding interior doors - ITB-KOT-2018/0296 edition 1;
- Technical doors GUARDIA EI30 and EI60 (wooden interior entrance doors of HALSPAN system) - ITB-KOT-2018/0407 edition 1;
National Certificate Of Stable Performance AC 158-UWB-W1355;
- Technical doors IGNIS - ITB-KOT-2018/0599 edition 1, National Certificate Of Stable Performance AC 158-UWB-W1337;
- Interior entrance doors EGIDA with increased resistance to breaking-in - ITB-KOT-2018/0598 edition 1;
- Adjustable door frames for interior doors - ITB-KOT-2019/1221 edition 1;
- Block door frames for interior doors OB3 type P - ITB-KOT-2017/0312 edition 1;
- Door frames SARA-PRO for interior doors - ITB-KOT-2019/1076 edition 1.

CERTIFICATES AND AWARDS:

GOOD BRAND 2019 AND 2021

FOILED AND MODULAR DOORS:

FOILED DOORS

Visually **foiled doors** are lighter than modular ones, which is combined with their stability. Construction: frame made of MDF board or finger joint pinewood. Filling : "honey comb" or tubular chipboard, which can be ordered at extra charge. The frame with filling is covered with 3 mm-thick HDF board from both sides and wrapped into decorative foil. For installation of filling elements in these doors, the glazing bars of different profiles are used.

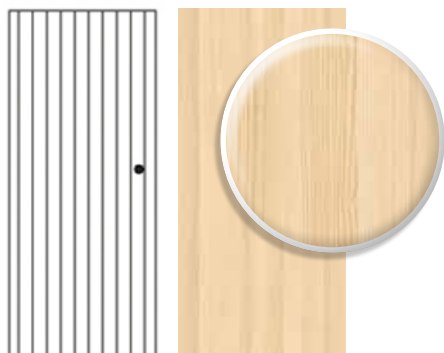

MODULAR DOORS

Construction of **modular doors**: 2 vertical elements, upper and lower horizontal elements. Filling: MDF panels of different thickness or glass 4 mm- thick. For each model you can select a decorative foil. Glasses and other filling elements in these door leaves are not installed using glazing bars, but at the same time with all the construction elements, which greatly improves their stability.

FOILS - TYPES OF WOOD STRUCTURE (GRAINING):

Structures of INVADO foils can be divided into 3 categories:

UNIDIRECTIONAL FOIL WITH VERTICAL STRUCTURE:

Most of INVADO foils is available in this type of structure. Exceptions: Chestnut, Elm (ENDURO), Italian oak and Severo oak (ENDURO 3D).

UNIDIRECTIONAL FOIL WITH HORIZONTAL STRUCTURE:

Currently in INVADO offer there are two foils with the structure. These are: Italian oak and Severo oak (ENDURO 3D).

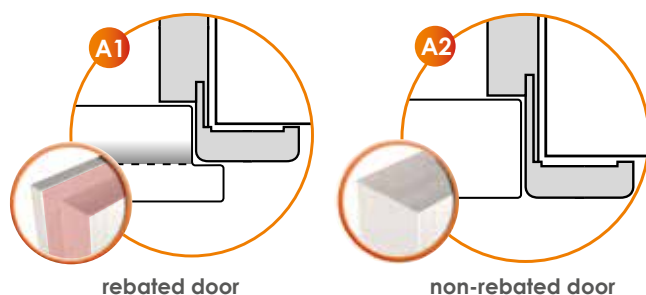

BIDIRECTIONAL FOIL WITH VERTICAL AND HORIZONTAL STRUCTURE:

The foil joining two above types of structure. There are two foils in INVADO offer joining these types of structure. These are: Chestnut and Elm (ENDURO).

These 3 types of foils can be applied in case of foiled doors only. In case of modular doors, due to different construction, the structures of vertical and horizontal elements are different.

REBATED AND NON-REBATED DOORS:

The edge of **rebated door** leaf is finished with a rebate (highlighted in red on the picture A1), which is placed on a door frame, when the door is closed. Door leaf produced in this way does not fit flush with a door frame.

The edge of **non-rebated door** leaf has no additional finishing, i.e. this is a flat surface. Door leaf produced in this way fits flush with a door frame (A2).

LEFT AND RIGHT DOOR:

left door

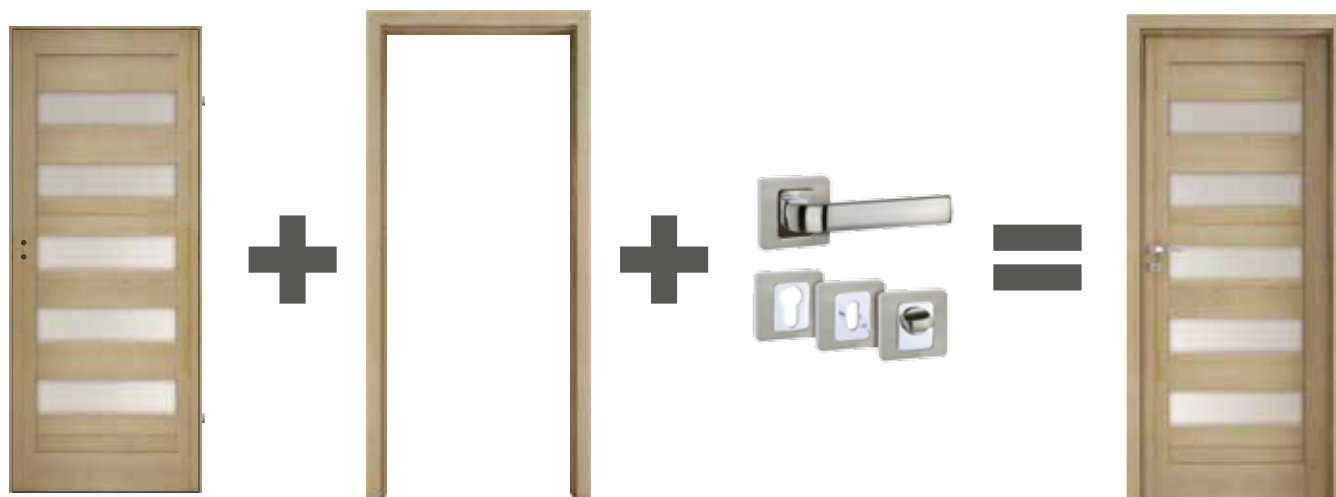

right door

Before buying a door, this is worth considering in which direction it should be open. For safety reasons, the bathroom or kitchen door should be installed in this way to be open to the outside. In other areas this is dependent on the convenience of users and the layout of apartment or house. The next step is to determine which door we are looking for: right or left. What does it mean? If the hinges are installed on the right side of a door frame, that means we need a right door, if the opposite – we have to select the left door. So before going to the store it is worth to reconsider this question and write down a list of needed right and left doors, and for each of them to determine the direction of opening.

CALCULATION OF DOOR PRICE:

In most cases, the prices quoted are prices per door leaf without a door frame and door handle (exceptions are: GUARDIA, SONUS, SLIDING SYSTEMS). In order to obtain the full price of the door set, you have to use the following calculation:

door leaf price

+

door frame price

+

handle price

=

door set price

One of the most popular series of INVADO doors - DESTINO UNICO - has been awarded a "Gold Medal". These door leaves are a bold combination of colors, that allows to create intriguing, stylized interiors. Therefore we had no doubt, that this is the series to be reported to the prestigious "Gold Medal" contest, organized at the International Poznań Fair BUDMA. The IPF "Gold Medal" is one of the most recognizable awards in the Polish market, which is awarded to innovative products of the highest quality. We are proud and we thank to all those involved in the production and sale of doors Destino Unico.

Only available as a door frame colour for:

- BLOCK DOOR FRAME,
- ADJUSTABLE DOOR FRAME,
- ADJUSTABLE DOOR FRAME FOR NON-REBATED MODULAR DOORS

CONSTRUCTION

- folding doors consist of a folding door and a block door frame or adjustable door frame

- 1 • construction of each half of the folding door consists of a frame made of MDF board or 33 mm thick semi-finished coniferous wood glued in layers.
- 2 • filling - "honey comb"
- 3 • frame and filling are covered with 3 mm-thick MDF boards
- 4 • door leaf covered with ENDURO foil or ECO-VENEER

- each half door leaf has a rabbet along the vertical edge
- both parts of door leaf are joined together with hidden hinges
- the door leaf is connected to the floor with a spigot fixed in the holder, which is bolted to the floor
- the upper part is connected to the door frame with a spigot fixed in the holder, which is mounted in the rail bolted to the upper element of door frame
- the sliding mechanism (trolley), mounted in the rail, stabilizes the door leaf when opening and closing
- rounded vertical edges of door leaves (**more info on page 94**)
- universal door leaf for left or right-hand assembly
- width of single doors "60" - "90"

STANDARD EQUIPMENT

- 2 silver round grips in silver color
- 2 hidden hinges in silver colors

AVAILABLE GLASSES (THE MATT SIDE OF GLASS IS ON THE HINGES SIDE)

- satinato

standard - no extra charge

AVAILABLE DOOR FRAMES

- [OB3] - block door frame (possibility to add an architrave 10 x 60 mm or 16 x 80 mm) **info - page 95**
- [ORS1] - adjustable door frame with a flat angle architrave 60 mm-wide **info - page 96**
- [ORS8] - adjustable door frame with a flat angle architrave 80 mm-wide **info - page 96**

ASSEMBLY AND
INSTALLATION**

Fire doors should be a subject of technical inspections and maintenance operations in accordance with the rules set out in the applicable standards and regulations on fire-resistance doors. Technical and maintenance inspections should be carried out at least once a year.

APPLICATION:

IGNIS fire doors are flush, rebated and single door leaves with fire resistance El₂ 30. Door frame is made of non-flammable chipboard. Door leaf and door frame made of nonflammable chipboard can be installed in walls with fire resistance class El₂ 30 according to PN-EN 13501-2: 2016 and min. density 575 kg/m³, in case of masonry walls made of ceramic or silicate bricks with min. thickness of 115 mm, concrete or reinforced concrete walls with min. thickness of 115 mm and walls made from blocks or cellular concrete blocks with min. thickness of 115 mm.

The doorset is supplied completed with:

- cylinder insert according to requirements of PN-EN 1303: 2015-07,
- self-closing according to requirements of PN-EN 1154: 1999 / AC: 2010P,
- complete door handle according to requirements of PN-EN 1906: 2012.

DOOR LEAVES IGNIS ARE SOLD ONLY AS A SET WITH A DOOR FRAME, CYLINDER INSERT, SELF CLOSER AND HANDLE

Ventilation

According to the norm, the door to the bathroom, shower and separate WC should open outwards, have the passage width of at least 0.8 m and height of 2 m, and have the ventilation holes for the air supply in the bottom of the door with total ventilation area of at least 0.022 m². The total ventilation area is the sum of the gap under the door (standard 7 mm) and additional solutions that increase the total net ventilation area of such as: ventilation sleeves, ventilation undercut and ventilation grid.

The use of ventilation grid ensures the correct ventilation area for all door widths, while using the sleeve and / or undercut the increased gap between the door and the floor should be used in order to meet the required regulations. If the above mentioned regulations must be obliged the clients must trim the door on their own.

GUIDELINES FOR BUILDINGS EQUIPPED WITH A RECUPERATION SYSTEM

To ensure adequate air flow from the living areas to the corridor, sanitary and auxiliary rooms it is recommended to provide all internal doors should have a gap at the bottom of the door. The gap area in doors of living and auxiliary rooms should be at least 80 cm² (INVADO doors with undercut fully meet this requirement). The size of the ventilation gap in doors of sanitary rooms should be 200 cm².

DOOR FRAMES

ORS1 / ORS8

Adjustable door frame for rebated doors

ADJUSTABLE
DOOR
FRAME
INSTALLATION

CONSTRUCTION

- MDF board
- foiling – all decors available in INVADO offer
- standard adjustable door frame consists of central element plus 2 sets of angle architraves joined at 45°. Standard angle architrave consists of a flat architrave 60 mm-wide and a "tongue" 30 mm-long. There is a possibility to order:
 - adjustable door frame with a flat angle architrave 80 mm-wide [ORS8],
 - a set of flat angle architraves 60 mm or 80 mm-wide with a "tongue" 50 mm-long (this is to be ordered separately).
 See the table of options at extra charge.

OPTIONS AT EXTRA CHARGE FOR ADJUSTABLE DOOR FRAMES

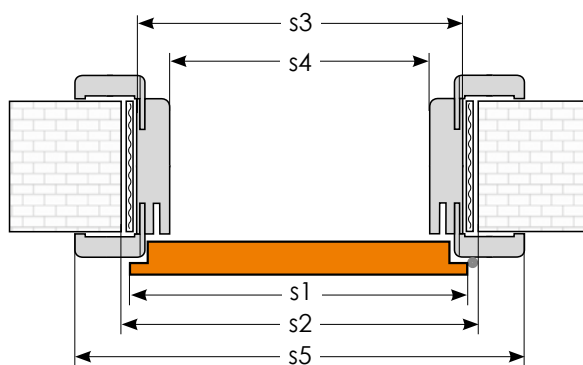

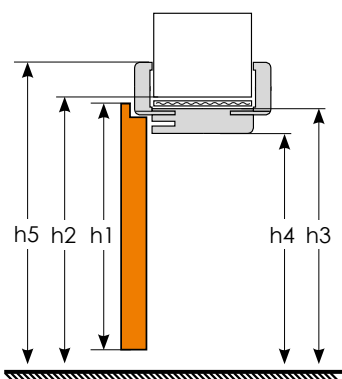

- door frames with sidelights and transoms (without glass) with circumference up to 5 l.m
- door frames for double doors
- additional hinge in door frame "60" – "80"
- standard angle architrave (a "tongue" 30 mm-long, an architrave 60 or 80 mm-wide)
- angle architrave with longer "tongue" (a "tongue" 50 mm-long, an architrave 60 or 80 mm-wide)
- wall framing ("blind door frame")

DOOR FRAME FOR DOOR LEAVES IN WIDTH

- width of single doors "60" to "100"
- width of double doors "120" to "200"

RANGES OF WALL THICKNESS COVERING

- Adjustable door frame is made in dimensions adjustable to the wall thickness in steps of 20 mm. The minimum wall thickness is 75 mm. **NOTE: due to special mills there is a possibility to trim the frame and reduce the wall thickness coverage by 15 mm.** Door frame for the wall thickness greater than 340 mm consists of at least two connected components.

ATTENTION:
It's possible to paint SARA-PRO door frame with a wall paint after previous painting with a primer paint included in the package

FEATURES

Housing (covering) of metal frame allows to install new doors in the rooms, where metal frames are mounted in accordance with the Polish standard (concerning dimensions) without necessity to remove these frames. The advantage of this solution is easy installation with mounting foam, without dirty floors and walls and the ability to mount a standard foiled INVADO door leaves.
